FUND DESCRIPTION

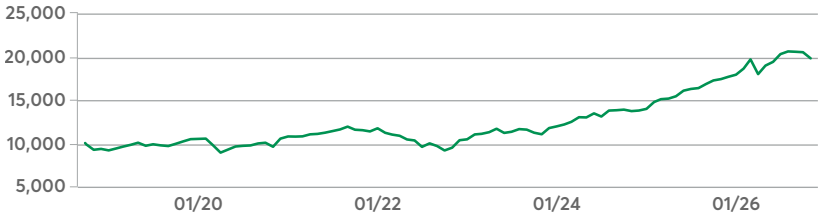

The ETF seeks to provide long-term capital appreciation through the use of a multifactor approach and to gradually reduce the portfolio's Financed Emissions (as defined in the Prospectus) while managing active risk. To achieve this, it invests primarily in equity and equity-related securities of large and mid-cap companies in developed markets (ex-USA ex-Canada) while ensuring that all constituent issuers meet pre-determined ESG standards (as defined in the Prospectus).

BENEFITS

- Selects developed markets securities, including the energy sector
- Multifactor approach
- Integrates environmental, social and governance (ESG) considerations
- Target to maintain a Financed Emissions level at least 25% below that of the benchmark index
